Experience

Livspace

August 2025 - Present

SDE - 2

Bengaluru, Karnataka

Tech Stack – *ReactJs, NextJs, TypeScript, JavaScript, Redux, Design Systems, Tailwind CSS*

- Led migration of high-traffic City and Experience-Centre pages from **Nuxt/Vue** to **Next.js** — delivering **38%** faster web performance, **42%** better LCP, and **25%** uplift in SEO visibility.
- Spearheaded re-platforming of the marketing landing page from **Nuxt/Vue** to **React 18** and **TypeScript**, redesigning the component tree and state layer; Core Web Vitals score improved by **35%**.
- Built a responsive Context-API portfolio filter with a reusable custom hook, CMS-driven filters, and analytics integration — **driving a 20% surge in gallery engagement**.
- Revamped the multi-step lead form, adding features like reCAPTCHA, observability, and automated tests; **improving lead-conversion rate by 12%**.

Walmart

June 2022 - June 2025

Software Engineer

Bengaluru, Karnataka

Order Management System (OMS) – *ReactJs, Redux, Mono-Repo (NX Js), NodeJS, Express*

- Developed and maintained a robust OMS platform, processing **millions** of orders with **99.9%** reliability.
- Worked on **MFE architecture**, integrating remote applications into a shell using Module Federation to enhance modularity and scalability.
- Engineered high-performance React components (e.g., **OrderDetailsPage** using **AgGrid**) with advanced sorting/filtering, improving accessibility by **30%**.
- Built custom filter components that improved search efficiency by **70%** reducing time-to-locate by end users.
- Refactored existing **Monolithic Dashboard UI** into modular, reusable components, reducing page load time by **25%** across devices.
- Migrated **REST-based API** layers to **GraphQL**, reducing overfetching and improving API efficiency by **40%**.
- Automated config management across **3+** environments using **GCP-based JSON resolution**.
- Created **6+** API endpoints for config, metrics (**/metrics**), and cache handling via GCP, reducing manual ops by **40%**.
- Actively participated in code reviews and **agile** development, collaborated with the team to ensure high-quality production releases, maintaining release timelines and reducing post-release issues.

User Management – *ReactJs, Redux, Mono-Repo framework (NX Js), JSX/CSS*

- Delivered **RBAC**-based User Management system for **50K+** users, including bulk import (CSV) and department-role mapping.
- Implemented bulk CSV file upload functionality, allowing efficient mapping of users, departments, categories, and suppliers.
- Integrated an advanced search and filtering system, enhancing the user experience within the **UserList component**.

Technical Skills

Languages: JavaScript, TypeScript, C++

Frontend: ReactJS, NextJS, Redux/Jotai, Module Federation (Microfrontend), Webpack, Saga, HTML5, Tailwind CSS

Backend/Integration: NodeJs, Express, RESTful APIs, GraphQL

DevOps/Cloud: Docker, Kubernetes, GCP, Jenkins, CI/CD

Database: SQL, MongoDB

Tools: Git, Postman

Testing/Code Quality/Coverage: Jest, RTL, SonarLint, SonarQube

Hands On Coursework: Data Structure, Algorithms, OOP, CS Fundamentals, Programming Principles

Education

Indian Institute of Information Technology

August 2018 – May 2022

Bachelor of Technology in Computer Science, CGPA: 8.01/10

Ranchi, Jharkhand
